Link Engineering

Dear Vince and Gino,

DE-WATERING BIN PROJECT

On behalf of the Nyrstar WorleyParsons Projects Alliance I would like to express our appreciation for the safe and successful work of your team during the construction and installation of the De-watering Bins. We have been delighted by the safe conduct and professional manner during the installation and have had a considerable amount of positive feedback from Nyrstar management.

Some of the key points that we feel contributed to the success are:

1. The quick turn around time on the fabrication of the bins having been given such short notice. Also, adhering to a high quality standard throughout the fabrication even though their time line was shortened.
2. Dedication to pre-start planning and risk assessment meetings (WRAC).
3. Approximately 5000 man hours with no MTI or LTI's, just minor incidents (ie. Glasses, respirators) which were dealt with promptly and in a professional manner when raised.
4. Excellent JSA's produced for the project, some of the best Nyrstar has ever seen (*comment was made by Brenton Hoare*).
5. Dedication to completing pre-task risk assessments and not relying solely on the JSA's.
6. Excellent work with the lift studies and safety surrounding the lifts.
7. Adherence to the schedule, on time or ahead of schedule

Though it was the Link team as a whole that helped to deliver this excellent outcome, I would like to give credit to the leadership of the installation supervisors, Raul Casagrande, Gino Ugonotti, Mick Stabile and Paul Daly.

NWPA is committed to establishing effective working relationships with safe and professional construction contractors and look forward to working with Link Engineering in the future.

Kind Regards,

Mel Judd
